

SIBONGAKONKE SIMAMANE

FULL-STACK SYSTEMS DEVELOPER • AWS CLOUD CONSULTANT • SYSTEMS ANALYST

sibongakonke-simamane.dev simangalisoblessed@gmail.com 074 357 2309
Durban, South Africa github.com/sivuhGorha linkedin.com/in/sibongakonke-simamane

BOSTON DIPLOMA
76% Distinction
HDIPSD2 • Confirmed 2026

// PROFESSIONAL PROFILE

Technically versatile, distinction-level **Systems Development Graduate** currently employed as a Junior Systems Developer & Cloud Engineer at **Future ProTechY (PTY) LTD**. Holds a confirmed Higher Diploma in Systems Development (HDIPSD2) from Boston City Campus with an overall **76% Distinction average**, alongside **CompTIA A+** certification and **CompTIA Security+** foundations. Experienced across the full software engineering lifecycle — designing and deploying production **Amazon Web Services (AWS)** cloud infrastructure (VPC, EC2, ALB, CI/CD), architecting robust backend APIs (Java, PHP, Node.js, MySQL), building modern reactive frontends (JavaScript/TypeScript, React, Astro), and enforcing strict cybersecurity standards.

// TECHNICAL COMPETENCIES

Core Languages:	Java, PHP, JavaScript (ES6+), TypeScript, C, HTML5, CSS3 / Tailwind
Cloud & DevOps:	AWS (VPC, EC2, ALB, Route 53), Docker, GitHub Actions CI/CD, Linux, Nginx, SSL/TLS
Databases & Architecture:	MySQL (3NF Relational Schema, Sub-second Indexing), MS SQL Server, RESTful APIs
Frontend Frameworks:	React.js, Astro, Vue.js, Responsive UI/UX Architecture, Single Page Applications
Security & Networking:	CompTIA A+ (2024), CompTIA Security+, Ethical Hacking Basics, Subnet Isolation, Structured Cabling
Methodologies & Tools:	Agile / Scrum, Software Testing (TDD/Unit), Business Process Management (BPM), Git/GitHub, AI Automation

// PROFESSIONAL WORK EXPERIENCE

Junior Systems Developer & Cloud Engineer • Future ProTechY (PTY) LTD May 2026 – Present
Durban, KwaZulu-Natal • Full-time

- Actively architecting, configuring, and maintaining production cloud infrastructure on **Amazon Web Services (AWS)** — configuring isolated VPC topologies, public/private subnets, security groups, and **EC2 compute instances** hosting live applications.
- Designing, automating, and maintaining **CI/CD pipelines** using GitHub Actions for automated zero-downtime application deployments.
- Developing robust full-stack applications and backend services using **Java, PHP, JavaScript, and MySQL** supporting high-volume financial services systems.
- Managing application performance, server health monitoring, reverse proxy configurations (Nginx), and infrastructure security under strict operational standards.

Fiber Installation Technician & Administrator • Babicon (PTY) LTD Mar 2026 – May 2026
Durban, KwaZulu-Natal • Field Operations & Technical Administration

- Performed fiber optic network installations, termination, and routing configurations at client premises across the Durban metropolitan area.
- Handled key administrative functions including project documentation, client sign-offs, reporting, and operational task coordination.
- Balanced technical field deployments with office-based records management, ensuring compliance with ISP service level standards.
- Gained direct hands-on experience in physical network infrastructure, structured cabling, optical testing, and telecommunications deployment.

Part-Time Systems Technician • Inguni Shield Feb 2025 – Jan 2026
Durban, KwaZulu-Natal • Part-time Systems Support

- Performed comprehensive system configurations, programming, and hardware/software installations across diverse client operating environments.
- Maintained and debugged codebase routines in **C and Java** within a live technical support and systems implementation setting.
- Developed and deployed static web solutions utilizing modern JavaScript tooling and component frameworks (Astro).
- Delivered responsive technical diagnostics, hardware upgrades, and routine software maintenance for commercial clients.

// PROFESSIONAL WORK EXPERIENCE (CONTINUED)

EA Group Leader — BEEI Phase V • Zubane Primary School June 2025 – Nov 2025
Ndwedwe, KwaZulu-Natal • Leadership & Programme Coordination

- Led a team of Education Assistants across daily attendance tracking, task delivery, curriculum support, and compliance reporting.
- Acted as primary liaison between government programme coordinators, school executive management, and team members.
- Spearheaded onboarding, technical guidance, workflow optimization, and performance monitoring of newly appointed assistants.

Education Assistant • KZN Department of Basic Education June 2025 – Nov 2025
Ndwedwe, KwaZulu-Natal • Government Youth Employment Programme

- Managed electronic data capturing, records management, and statutory reporting with a verified 100% accuracy and zero discrepancy rate.
- Handled confidential administrative files and student information with full compliance and strict adherence to POPIA privacy guidelines.
- Coordinated daily communication workflows between educational staff, administrative leadership, and external regional stakeholders.
- Provided comprehensive technical and administrative support to guarantee smooth daily operational delivery.

// FEATURED PRODUCTION PROJECTS

Asante Financial Services Website & Online Loan Platform • asantefs.co.za

2026

Production Financial Platform • Stack: PHP, MySQL, JavaScript, HTML5, CSS3, Apache

- Architected and delivered the full customer portal and business website for Asante Financial Services, a regulated short-term personal finance provider in South Africa.
- Engineered a dynamic, database-driven loan application engine featuring multi-step form validation, online document submission, and automated backend record processing.
- Implemented secure customer data handling, defense-in-depth input sanitization, and administrative management workflows complying with financial regulations.
- Independently managed the entire lifecycle from requirements discovery and relational schema modeling to live production server deployment.

Production AWS Cloud Infrastructure & Automated CI/CD Pipeline

2026

Cloud Architecture & DevOps • Stack: AWS (VPC, EC2, ALB, Route 53), Docker, GitHub Actions, Linux, Nginx

- Designed isolated VPC topologies with segregated public and private subnets, internet gateways, NAT gateways, and custom security groups.
- Provisioned EC2 compute instances behind an Application Load Balancer (ALB) with automated SSL/TLS termination and health check monitoring.
- Configured automated GitHub Actions CI/CD workflows executing automated linting, test suites, and zero-downtime containerized deployments.

Secure Financial Transaction & Processing Backend Engine

2026

Backend Architecture • Stack: Java, PHP, MySQL, RESTful APIs, CompTIA Security+ Standards

- Engineered a robust, transactional backend engine designed for processing high-integrity customer records, loan submissions, and verification workflows.
- Structured a 3NF normalized relational schema in MySQL with strict referential constraints, indexing for sub-second queries, and automated audit logging.

// EDUCATION & CERTIFICATIONS

Diploma in Systems Development (HDIPSD2) • Boston City Campus

2023 – 2026

Graduated with Distinction (76% Overall Average) • Confirmed by Office of the Registrar (April 2026)

Systems Analysis & Design: 90%	Praxis (Applied Systems): 92%	Security+ Fundamentals: 88%
Software Testing: 86%	Java & Database Systems: 86%	Computer Literacy: Distinction

CompTIA A+ • CompTIA International Certification

Certified 2024

Industry credential verifying core IT operational roles, hardware, operating systems, and networking security.

National Senior Certificate • Nombika High School

Completed 2019

// LANGUAGES

- isiZulu: Home Language (Native / Fluent)
- English: Professional Working Proficiency (Fluent)

// FOCUS & INTERESTS

- AWS Cloud Architecture, Containerization & CI/CD Pipelines
- Cybersecurity, Ethical Hacking & Secure Code Standards
- Emerging AI Developer Tooling & FinTech Systems
